

ZULU NYALA

Experience the Magic of Africa

A Brief History

1981 - With Trevor Shaw at the helm, the dream, the passion and the foundations of Zulu Nyala began. The name is based the predominant Zulu culture in the area and the beautiful and shy Nyala antelope, native to Southern Africa and typical to the Kwa-Zulu Natal region.

1991 - A decision was made to sell off a section of the original property and a prime undeveloped portion with spectacular views was kept. Trevor Shaw began constructing a 'gentleman's camp', an exclusive 12 room thatch and stone lodge that took full advantage of the view. Since then, development has barely stopped and the original camp has grown to become a magnificent private lodge that today hosts guests from all around the world. Over a period of time, Zulu Nyala acquired numerous adjoining neighbouring properties.

The game reserve surrounding the Safari Game Lodge is home to over 40 different animal species and hundreds of different bird and indigenous plant life.

1993 - Country Manor was originally bought as a private homestead on the outskirts of Johannesburg. Today, with its beautiful 13 acres of gardens, mini game reserve and luxurious accommodations, The Manor is perfectly situated close to Lanseria and OR Tambo airports, shopping malls as well as a multitude of historic places to visit.

1996 to Present - Zulu Nyala acquired the gracious Heritage Safari Lodge adjacent to the Zulu Nyala Game Reserve. The lodge has since been restored and additional accommodation has been added that includes the Heritage Tented Camp & Luxurious Heritage Suites.

Help Save The Rhino

As you may be aware the Rhino population in Africa is facing a serious threat and Rhinos are well on their way to becoming an endangered species.

Three to four Rhino are being poached per day in Africa and very soon this timid and passive creature will be extinct if nothing is done to aid in the protection and stabilization of the Rhino population.

"One thing is clear: If we hope to protect rhinos from being plundered to extinction, then we must educate consumers of rhino horn that it has no medicinal value or curative properties - before it's too late"

Rhishja Larson
Founder & Program Director of Saving Rhinos LLC
